By Appointment

The Nave, Gloucester Cathedral. The Nave of Gloucester Cathedral is 174 feet long and 84 feet wide. A notable feature is the unusual height of the piers. The Cathedral dates from 1089, but this particular part of the building has been altered and rebuilt several times, chiefly in 1242, 1818, and 1740. The east window is remarkable as being the largest in the world, 72 by 88 or 2,786 square feet.
